PROJECTS

RJ Catalog

Item catalog view with react.js and Node js. Product catalogs are tremendously useful marketing and sales assets that organize all your product information in one place.Since its main objective is to categorize product information.

Rental App

By using React js and node js.Renting, also known as hiring or letting, is an agreement where a payment is made for the temporary use of a good, service or property owned by another.

Brewery Api

By using DOM manipulation fetching data from third party API's to display their details and using filter to filter the specific key value to display on screen.In this project learn to get data from api.
